### Networked Access for Single Door

AXP110 is a cost-effective, standalone proximity access control system that offers advanced functionality typically associated with larger systems. The system replaces a conventional lock and key, giving the user complete control over unauthorized entry, a detailed audit trail of authorized access and a solution for the security threats of lost or duplicated keys. AXP110 is designed for use in commercial and residential environments such as daycare centers, healthclubs, business suites, retail stores and apartment complexes.

### System Features

- Comprehensive software allows for easy configuration, management and monitoring from a standard PC or Internet browser (Ethernet connectivity required).
- Accurate time management reporting through support of up to two Amano proximity readers for anti-passback applications.
- Third party intrusion panel interaction for arming and disarming an alarm from a keypad proximity reader.
- Simple intrusion alarm activates a siren when a door-open sensor is triggered.
- Compatibility with most proximity tags.
- Powerful web-based reporting system accessible from any web-enabled device.
- Batch enrollment.
- Integrated badge printing.
